

## Data Driven Decisions Workshop

Are you a farmer wanting to understand what's really happening on your farm?  
Then come along to our free workshop for some simple tips and tools for better management decisions!

- ✓ **Practical Decisions** - By discussing how to efficiently collect data and through demonstrating data collection instruments, we'll help you understand how to incorporate data insights into your decision making process!
- ✓ **Improved Efficiency** - Hear real-world case studies from producers outside your commodity. Learn about how they've realised potential and increased efficiency by using data to make decisions on their property. Case studies will include: Fertiliser Application, Asset Monitoring, Individual Animal Management and Farm Business Record Management.
- ✓ **Farm Ready Skills** - This workshop will demonstrate how an increasingly Digital Environment affects reliable data collection, efficient use of resources and analysis of objectives to achieve conclusions supported by evidence and much more!

Facilitated by CQUniversity's Research Fellow in Agri-Tech Education & Innovation  
Amy Cosby
